

HOW TO PREP HULI FOR REPLANTING

LŪ'AU
KALO LEAF

Cut off lū'au and use to cook foods such as laulau or stew. Hā(stem) can be used in such foods as well.

MĀWAE
CLEFT WHERE NEW LEAF GROWS

Cut hā(stem) right above māwae.

HULI

KŌHINA
WHERE HULI AND KALO MEET

Cut just below kōhina. Allow freshly cut huli to "scab" over at least a day before replanting.

HULUHULU
ROOTS OF KALO

Remove huluhulu cleanly by pulling from base and upwards towards lū'au.

PAPA HANA
KUAOLA
